

SnapMax

The mini greenhouse for vines

Invented in 1995, SnapMax saves growers time and money, whilst maximising vine growth for earlier returns. SnapMax is supplied pre-assembled so installation takes just seconds.

Adjustable
length!

New Benefit for growers

SnapMax is now longer to allow for ground/wire height variations.

A perfect fit every time.

SnapMax sizes

850mm
900mm
1000mm
1100mm
1200mm

Other sizes made to order.

NEW dripper wire strap for high wind sites, plus weedmats for better growth.

The benefits of SnapMax Vineguards.

- Promotes healthier, faster growth straight to the wire
- Pre-assembled for super-fast installation
- Supportive 'U' saddle prevents growing tip breakage/damage
- Supportive 'U' saddle allowing uni or bi-lateral training
- Extended guard length allows for ground/wire height variation
- Translucent for drive by visual vine monitoring
- Micro ventilation for vine health in humid & extreme heat conditions
- Protection from deer, hares and herbicide
- Unique durable double tab locking seal
- UV stable long life polyethylene, reusable & recyclable at end of life
- Includes sturdy clip to securely fasten guard to wire on windy sites

Strongly recommended

"For us, they are the best guards we've tried. We get nice growth out of them – it's a good environment inside, they grow well. The strength of the plastic means we can use them for several years, as we are doing lots of replanting. They're easy to use and they stay on really well."

Andrew George,
Vineyard Manager, Yarra Yering

WeedMat (optional)

Weedmat prevents weed growth inside guard and preserves soil moisture.

Installation

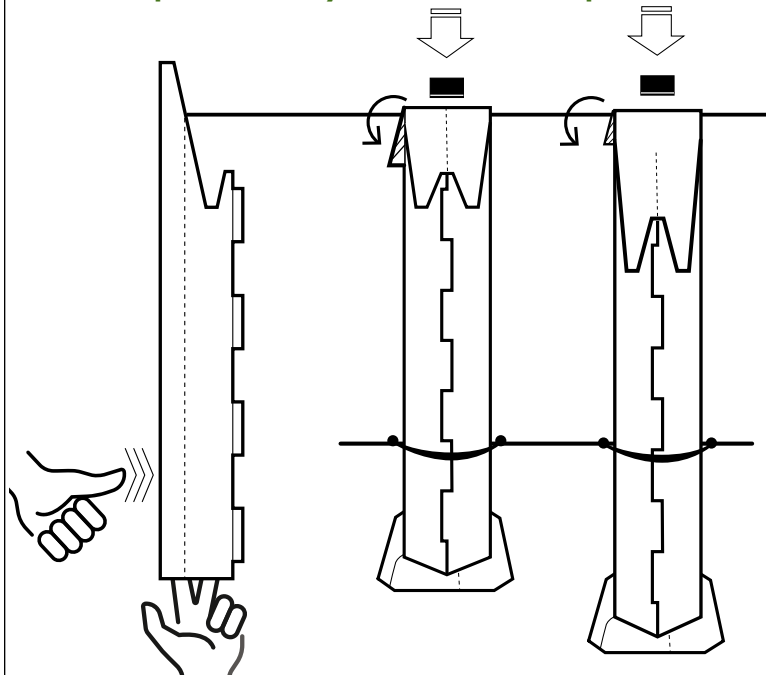

Dripper Strap (optional)

The adjustable Snaphook strap secures the base to the dripper wire.

SnapMax easy to install - A perfect fit

Start at base to prise open. Press back ridge flat into triangle shape.

Place over vine, fold top tab back over wire and fasten with clip.

Proven performer

"Relying on Snapmax for many years, CMV Farms planted an extra 120,000 vines in 2018 using SnapMax 1100mm VineGuards. We have been using Snapmax for the last 5 years. We have tried other guards but haven't had the success that we do with SnapMax, they outperformed the other guards. Snapmax are very clear, you can see the vine and we get uniform growth. The vine is up and along the wire well inside six months."

Phil Reilly, Vineyard Manager, CMV Farms
