SnapMax Vineguards

Invented in 1995 and sold worldwide, SnapMax saves growers time and money, whilst maximising vine growth for earlier returns. SnapMax is supplied pre-assembled so installation takes just seconds.

SnapMax benefits

- Promotes healthier, faster growth straight to the wire
- Pre-assembled for super-fast installation
- Supportive 'U' saddle prevents growing tip breakage/ damage
- Supportive 'U' saddle allowing uni or bi-lateral training
- Extended guard length allows for ground/wire height variation
- Translucent for drive by visual vine monitoring
- Micro ventilation for vine health in humid & extreme heat conditions
- Protection from deer, hares and herbicide
- Unique durable double tab locking seal
- UV stable long life polyethylene, reusable & recyclable at end of life
- Includes sturdy clip to securely fasten guard to wire on windy sites

SNAP1200	Fits wire height 1200 to 1260mm	50pk
SNAP1100	Fits wire height 1100 to 1160mm	50pk
SNAP1000	Fits wire height 1000 to 1060mm	50pk
SNAP900	Fits wire height 900 to 960mm	50pk
SNAP850	Fits wire height 850 to 910mm	50pk

Height adjustability

SnapMax comes with extra length so you can adjust height to the wire in case of ground variation.

SnapMax Vineguards

Trellising straps

SnapHook straps are ideal for attaching vine guards or tree crops to trellis wires. For use in the:

Vineyard - they are designed to hold the vine guard base to the Dripper Wire on windy sites.

Tree growing / tree crops - they are use with trellising to hold stems and to train and position branches.

SNAPHOOK21	Strap with 3 adjustable lengths 19, 20 & 21cm long
SNAPHOOK265	Strap with 3 adjustable lengths 22, 24 & 26cm long

Vineguard Weedmat

Weedmats reduce weed competition and help preserve moisture around the base of new plantings.

Made from recycled paper and designed to work with vineguards to keep guards clear of weeds.

Size: 105x105mm.

greenPOD: Paper Treeguard

greenPOD – the natural way to protect and grow healthy seedlings

- Made from heavy duty, 100% recycled paper board, greenPOD doesn't have plastic coatings, so it protects the surrounding environment
- Life expectancy of 18 months+, recycled paper breaks down during growth of seedling
- greenPOD's natural colour reduces the visual impact
- greenPOD shelters seedling from intense weather and heat fluctuations yet provides the perfect growing environment
- Simple and easy to install
- Protects from browsing animals and herbicide spray.

Plant & treeguardards

EZYGuard: Reusable Treeguard

Welded seam ready to pop open and insert stake. EZYguard's unique patented instalock design that holds the stake secure in the rear spine prevents spinning when using a normal hardwood stake with a 22x18mm (or larger) profile, saving the cost of custom-made stakes. Features an additional stake slot on the inside right of the guard, to secure the guard in high wind areas and potential animal rubbing. Made from long lasting HDPE (high density polyethylene) it doesn't split or tear. Uv stabilised with a life expectancy 3 years plus.

Erosion & Weed Control

JutePro: Thick-Mat

JutePro Thick is the robust weed and erosion control geotextile blanket made from natural Jute fibres. Jute (*Corchorus* spp.) is a plant found on the sub-continent and where it is sustainably farmed.

The superior grade of jute fibre is cleaner and improves the tensile strength of the matting, improving its performance on steep embankments and in storm events. Being denser, it provides good weed suppression, erosion control and moisture retention for better plant establishment and survival.

JutePro Thick is a roll out mulch barrier, providing weed suppression and moisture retention to enhance plant establishment, while protecting the topsoil from erosion.

JutePro Thick is made from selected, long clean Jute fibres to add strength and longevity.

JutePro is 100% organic and biodegrades over time.

Application

Natural mulch mat for weed and erosion control, ideal for:

- Slopes up to 1:1 grade
- Roadsides and open spaces
- Revegetation areas and garden beds
- Wetlands, Ephemeral zones, and riparian batters
- Coastal and high wind sites
- Water velocities up to 1.8 metres per second

Product Range

JUTEPROTM750S	JutePro Thick-mat Roll - slit 1.83wide x 25m long (45.75m ²) Weight 750gsm
JUTEPROTM750	JutePro Thick-mat Roll - unslit 1.83wide x 25m long (45.75m ²) Weight 750gsm

Specifications

Name	JutePro Thick.
Material	100% organic, biodegradable, high quality, long fibre Jute.
Construction	Central Hessian (3oz) scrim. Upper and lower layers of jute fibres are tightly needle-punched onto the scrim.
Mass	750 gsm (nominal)
Density	110-120Kg/m ³ (nominal)
Weight	35kg per roll (nominal)
Pinning rate	3 - 4 pins per m ²
Dimensions	1.83m x 25m (45.74m ²)

Supply

JutePRO Thick can be supplied as individual rolls or purchased as a palletised pack for cost efficiency.

Example:

Double stacked pallets for a total of 18 rolls, 1.8m x 1.2 x 2.3m

Other pin sizes by request including irrigation and galvanized.

Erosion Control

Soil Saver: Jute Mesh

Soil Saver is a loose jute cargo net style mesh. Its open structure allows grass and vegetation growth through, while providing erosion control and a microclimate for seed germination.

This open net can be draped over existing vegetation eg on sand dunes where it will capture sand and native seeds. Ideal for use on earthwork sites, slopes, coastal environments, swale drains and riverbank environments.

SOILS500ROLL

Soil Saver 1.22m x 68.5m Roll (83.5m²) 500gsm 28 Rolls per pallet

SOILS500BALE

JuteMesh bale 1.2mx549m (658m²)

The CoirPro Range

Coir (coconut fibre) is ideal for products like erosion control and vegetation establishment geotextiles and silt berms. Coir has a high lignin content that gives it a 'woody' characteristic which enables it to cope with high-energy water flows with a long degradation period of 3-5 years.

CoirPro Mesh

CoirPro mesh is a durable long-lasting ground cover matting. Its open structure allows grass and vegetation to grow through, while providing erosion control and a microclimate for seed germination. Ideal for use in wetlands, slope revegetation up to 1:1 grade, swale drains, sand dunes and riverbank environments.

COIRPROM400	CoirPro Mesh Roll - 2m wide x 50m Roll (100m ²) 400gsm
COIRPROM700	CoirPro Mesh Roll - 2m wide x 25m Roll (50m ²) 700gsm
COIRPROM900	CoirPro Mesh Roll - 2m wide x 25m Roll (50m ²) 900gsm

CoirPro Matting

Biodegradable CoirPROmat is ideal for immediate surface protection and erosion control until vegetation is established. Its open structure allows grasses and vegetation to emerge through the matting while providing longer term soil erosion control. CoirPROmat is made from coir fibre stitched together with jute and cotton threads.

COIRPROMAT300	CoirPro Matting Roll - 2.4m wide x 50m Roll (120m ²) 300gsm
COIRPROMAT450	CoirPro Matting Roll - 2.4m wide x 50m Roll (120m ²) 450gsm

Erosion & Sediment Control

CoirPro Logs

CoirPro logs are a robust, long life coir fibre berm. Ideal for erosion control in wetlands, river and coastal environments, drainage lines, steep slopes and for ash control after bush fires. Coir logs can also be used for sediment entrapment, wave and wind protection.

- Coir naturally breaks down for environmentally sensitive areas
- The robust coir fibre is ideal for the use in riparian environments, river banks, streams
- Coir logs are an alternative to rip rap and other coastal shoreline structures
- Steep slopes and gullies
- Open swale drains along roads where water and sediment can be captured
- For use in landscape rehydration projects as Leaky weirs, slowing streams and balancing flows
- Soil stockpiles, building sites, gutters and footpaths.

Seasol & Planting Tools

Seasol Range

Sea5L Sea20L Available in 5 or 20L	Seasol Commercial Concentrate is a 100% liquid seaweed plant conditioner that provides a synergistic range of natural compounds, trace elements, alginates and carbohydrates from a blend of brown kelps. Seasol promotes root growth, and improves plant tolerance to environmental and climatic stress. By promoting root growth, Seasol also has the effect of enhancing fertiliser efficiency.
Power5 Power20 Available in 5 or 20L	PowerFeed is a fortified fish fertiliser, that is blended with liquid humate to produce a highly efficient complementary liquid feed with dual action benefits for plant growth and soil condition.
Seawetter5 Seawetter20 Available in 5 or 20L	Seasol Soil Wetter is a soil treatment that allows the water to get in and stay in the ground, maximising the water usage. It is specially formulated with surfactants to modify wettability of hydrophobic soils and increase water-holding capacity. Boosted with kelp and humate to stimulate root growth and improve plant access to water and nutrients.
Earthcare10 Earthcare25 Available in 10 or 25kg	Earthcare Water Crystals, when incorporated into a soil or potting media, absorb and retain large quantities of water and water-soluble nutrients. Unlike most products that become hydrated, Water Crystals are able to release the absorbed water and nutrients, thereby allowing the plant to have water and nutrients available as needed.
Earthcarepg10 Available in 10kg	Earthcare Planting Gel delivers a scientifically formulated blend of Seasol and power-fish from semi-hydrated water crystals, directly into the root zone of plants & turf to increase survival rates after transplanting.

STA Logger

The STA logger is an automated GPS and data logging attachment designed to integrate with your existing weed control tools.

About the STA logger

A weed control solution designed for recording the metrics that are important to the forestry, land management and conservation industries.

You'll see where your weed control team has been, where they sprayed and can quickly analyse the patterns with a simple and easy to use reporting system. It's so easy, field operators simply clip it on and forget it's there.

Control is back in your hands with an efficient way of collating your data, reducing any operators' inefficiencies and improving reporting to clients, funding bodies and management.

Why the STA logger matters

Simplicity of use

Field operators don't need to do anything. Once fitted, it is entirely automatic in its data collection and processing. Let your field operators do what they are best at and let the STA logger get you the data you need.

Ease of reporting

Your reports have never been easier with analytics and map production available through browser interface with no technical ability required.

Efficiency

There's no handling or processing of GPS files and it requires no manual intervention of any kind (other than charging a unit's battery) making all your weed management operations highly efficient.

Field viewing of data

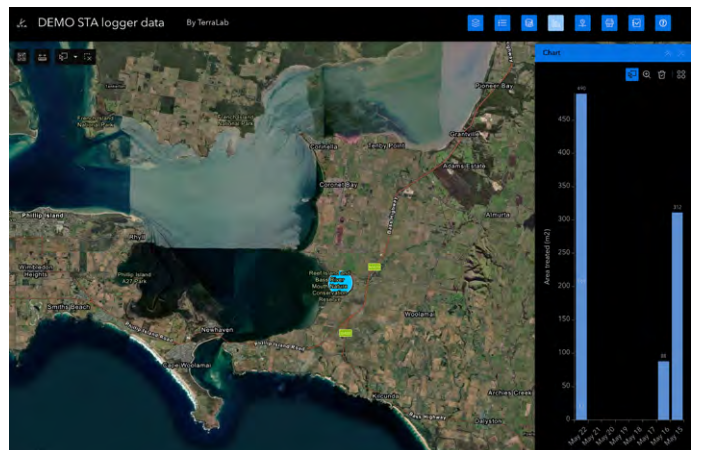

Allow your operators to use Esri supported mobile apps in the field to navigate to infestations and locate weeds. iOS, Android and Windows are all supported.

Designed for the land management industry

Unlike other devices that are designed for general purpose or agricultural use, the STA logger is designed for recording and reporting the weed control metrics that are important to forestry, land management and conservation industries.

Integrate into your GIS

If your organisation or client uses GIS, they can add the data as a layer (without download) for advanced analysis or map production.
