## Pioneers in Sustainable Solutions

Global Green Environmental is a leader in sustainable land management solutions, dedicated to addressing and mitigating environmental challenges faced by communities, local governments, and organisations across Australia. Global Green has created and supplies eco-friendly products that foster biodiversity, prevent soil erosion, and support land rehabilitation. Combining science-backed solutions with a commitment to environmental stewardship, Global Green has established itself as a trusted partner in the environmental sector.

## Our Mission and Vision

Global Green's mission is to make a positive environmental impact by developing products that contribute to a healthier, greener planet. With practical tools and resources, Global Green empowers communities and organisations to restore and protect ecosystems, increase biodiversity, and create a lasting legacy of sustainability. Its vision revolves around thriving local ecosystems, supported by sustainable practices that benefit both people and the environment. From coastal restoration and bushland regeneration to urban revegetation, Global Green offers products adaptable to diverse landscapes and climates.

## Expertise and Commitment to Sustainability

With years of experience and a strong commitment to sustainable practices, Global Green collaborates with environmental scientists, ecologists, and local councils to ensure high standards of environmental responsibility. By prioritising natural materials and eco-friendly design, Global Green supports landscape rehabilitation while reducing synthetic waste. Products are tested to meet quality and environmental standards.

## Partnering and collaboration

Global Green partners with local governments, Landcare groups, and community organisations across Australia. We offer personalised consultations, site visits and sample products for assessment to enable tailored solutions for each project. Through these collaborations, Global Green actively supports projects that protect and revitalise landscapes for future generations.

Global Green Environmental is committed to advancing sustainability and ecological resilience. With a broad product range and a strong foundation in environmental science, Global Green is prepared to meet Australia's evolving environmental conservation challenges, one project at a time.

## How to Order from Global Green Environmental

Ordering from Global Green Environmental is designed to be simple, efficient, and tailored to the unique needs of your environmental projects. As a leading provider of sustainable land management solutions, we aim to make the purchasing process seamless, whether you're sourcing erosion control, revegetation, or habitat restoration products. Our team is ready to assist you with selecting the best options to achieve your goals while supporting ecological sustainability.

### Step 1: Explore Our Product Range

To begin, visit our website at [www.GlobalGreen.com.au](http://www.GlobalGreen.com.au), where you'll find detailed information on our eco-friendly product line.

Each product page provides specifications, benefits, and ideal use cases, helping you make an informed decision. For larger projects or unique environmental needs, reach out to our team for a personalised recommendation.

### Step 2: Request a Quote or Sample

Once you've identified the products that best fit your project, you can request a quote directly through our website or by contacting our customer service team at **03 9967 1970** or [info@GlobalGreen.com.au](mailto:info@GlobalGreen.com.au). If you're interested in assessing the product quality before ordering, samples of certain items, like our JutePro Matting and GreenPOD Seedling Guards, can be provided upon request. This allows you to see firsthand how our quality products perform in your specific environment.

### Step 3: Place Your Order

After reviewing the quote and determining your needs, you can proceed with your order. Our team will confirm the product quantities, shipping details, and timelines to ensure your project is supplied promptly. Global Green strives to provide flexible order options, accommodating both small-scale orders for trial projects and large-scale shipments for extensive land rehabilitation.

### Step 4: Delivery and Ongoing Support

Global Green coordinates delivery to your specified site, ensuring that your products arrive securely and on schedule. If you have questions about product installation or maintenance, our team offers ongoing support to help you maximise the impact of your investment in environmental solutions.

## Partnering for Success

At Global Green, we value collaboration. Should you need a site assessment or project consultation, we're available to help. From placing an initial order to implementing our solutions on the ground, we are committed to providing you with the tools and guidance needed to achieve sustainable, effective results. To get started, contact us at **03 9967 1970** or visit [www.GlobalGreen.com.au](http://www.GlobalGreen.com.au) for more information on ordering and product availability.

# Tree Guards: MeshPRO

## MeshPro Guard "Extra Wide" guard

MeshPRO Guards by Global Green are designed to give land managers longer protection with less intervention. Their wider size allows more internal growth, and the larger diamond apertures helps harden plants and reduce plant damage during removal while still deterring browsing.

Black Diamond

TGMESHPRO45W	Mesh guard 45cm X 50cm (laid flat)	20pk
TGMESHPRO60W	Mesh guard 60cm X 50cm (laid flat)	20pk
TGMESHPRO90W	Mesh guard 90cm X 50cm (laid flat)	20pk
TGMESHPRO120W	Mesh guard 120cm X 50cm (laid flat)	20pk

# Tree Guards: GreenPOD

## greenPOD: Enviro Seedling Guard

GreenPOD is the natural way to protect and nurture seedlings.

**Eco-Friendly:** Made from heavy-duty, 100% recycled paper board, free of plastic films to protect the environment.

**Durability & Breakdown:** Life expectancy of 18+ months, breaking down naturally as the seedling establishes.

**Low Visual Impact:** Natural colour blends seamlessly into landscapes.

**Weather Protection:** Shields seedlings from extreme temperatures while maintaining optimal growing conditions.

**Easy Installation:** Simple design with secure locking system.

**Defence Against Threats:** Protects from browsing animals and herbicide spray.

## Sustainability & Design

**Premium Recycled Material:** Sourced from high-quality packaging, diverted from landfill.

**Thickness:** 1.25mm for strength and resilience.

**Secure Fastening:** Unique tongue-and-slot locking with non-tear stake ports for quick, stable installation.

**Versatile Stake Options:** "V" locking tabs allow multiple stake choices, eliminating the need for a specific type.  
(2 stakes recommended)

## Longevity & Breakdown

Not all fibrous materials are equal – GreenPOD is made from high quality paper packaging off cuts which undergoes advanced mechanical processing to extract the fibre. This fibre is then processed and compressed to provide a superior durable product.

No plastic coating means no delamination in the field.

Breakdown starts at the base over 18+ months, influenced by soil microbes and environmental conditions, ensuring a gradual, natural decomposition.

# GreenPOD - Trialled

GreenPOD Enviro Seedling Guards are fast becoming Australia's Guard of choice due to its innovative, modular design and trusted in-field reliability.

Global Green Environmental's commitment to sustainability and material science means that our products never stop evolving, and the GreenPOD range is no exception.

Since its inception in 2018, the GreenPOD Enviro Seedling guards have undergone continued development, improvement and trialling. This has led to the current incarnation of the product. It is also why it can withstand even the most extreme of environmental conditions.

## Longevity Trials:

Global Green's ongoing commitment to development and delivery of truly innovative and sustainable revegetation solutions means that there have been ongoing trials of our products over the past 8 years.

Our clients have delivered many hundreds of projects across the entirety of the continent. Some key projects in Queensland have had GreenPODs last until +/- 18 months, even with record rainfall and hot conditions.

A major, landscape scale project in Tasmania's North saw over 60,000 GreenPODs installed in late 2022 remained suitable for just on 24 months.

## KONKA Steel guards - The ultimate protection solution for your projects!

The **KONKA Wire Mesh Tree Guard** is a robust and versatile solution for protecting young trees and plants from wildlife and environmental threats. Engineered for durability and functionality, the KONKA Tree Guard is suitable for a wide range of applications in landscaping, revegetation, and natural resource management.

**Material:** 2mm galvanized wire mesh.

**Mesh size:** 100mm tall x 50mm wide

**Joining:** 35mm extended wires on side forms integrated locking mechanism.

**Tensile Strength:** Resists deformation from wildlife interference.

**Mesh Coating:** Galvanized post-welding to ensure long-lasting protection against rust, particularly at weld points.

### Spiked Ends:

- **25mm Spikes** on one end provide dual functionality:
- Placing spikes at the **top** helps prevent animals from accessing the plant from the top.
- Spikes positioned at the bottom can be embedded into the ground to stabilize the guard and block vermin access.

### Locking Mechanism:

- No tie wires required. **35mm Long Locking Wires** run down one side for easy and secure assembly, joining the mesh edges with minimal effort.

### Durable Construction:

- Precision-welded mesh ensures strength, with galvanized coating extending the product's life in harsh environmental conditions.
- Tensile strength helps maintain the guards shape.

### Versatility:

- KONKA is easily joined using the in-built locking wires to create larger diameter guards.
- Range of sizes for protecting all types of revegetation
- Economical and reusable.

Small	TGKONKA600	600x1135mm	10pk
Medium	TGKONKA900	900x1135mm	10pk
Large	TGKONKA1200	1200x1135mm	10pk
Extra Large	TGKONKA1500	1500x1135mm	10pk

Speak to us about our easy assembly option for the Konka range of guards!

**1 Hand held - Manual, using 'm' clips**

**2 Hand held - Electronic using 'c' clips**

**3 Semi-auto - Konka roller. The Konka roller takes just seconds to form the mesh into a cylinder - saving labour & time. Available to buy or hire!**

## EzyGuard: Reusable Tree guard

Welded seam ready to pop open and insert stake. EzyGuard's unique patented **InstaLOCK** clamps the stake secure to prevent spinning when using a normal hardwood stake, saving the cost of custom-made stakes as used on conventional flute guards.

Features an additional stake slot to secure the guard when using bamboo stake or in very high wind areas and potential animal rubbing.

<b>EZYGuard450</b>	Tree guard 450Hx200mm sides	50pk
<b>Ezyguard450W</b>	Tree guard 450Hx300mm sides.	25pk
<b>EZYGuard600</b>	Tree guard 600Hx300mm sides	50pk
<b>EZYGuard900</b>	Tree guard 900Hx300mm sides	50pk
<b>EZYGuard1200</b>	Tree guard 1200Hx300mm sides	25pk

## Ekidna Steel Guard

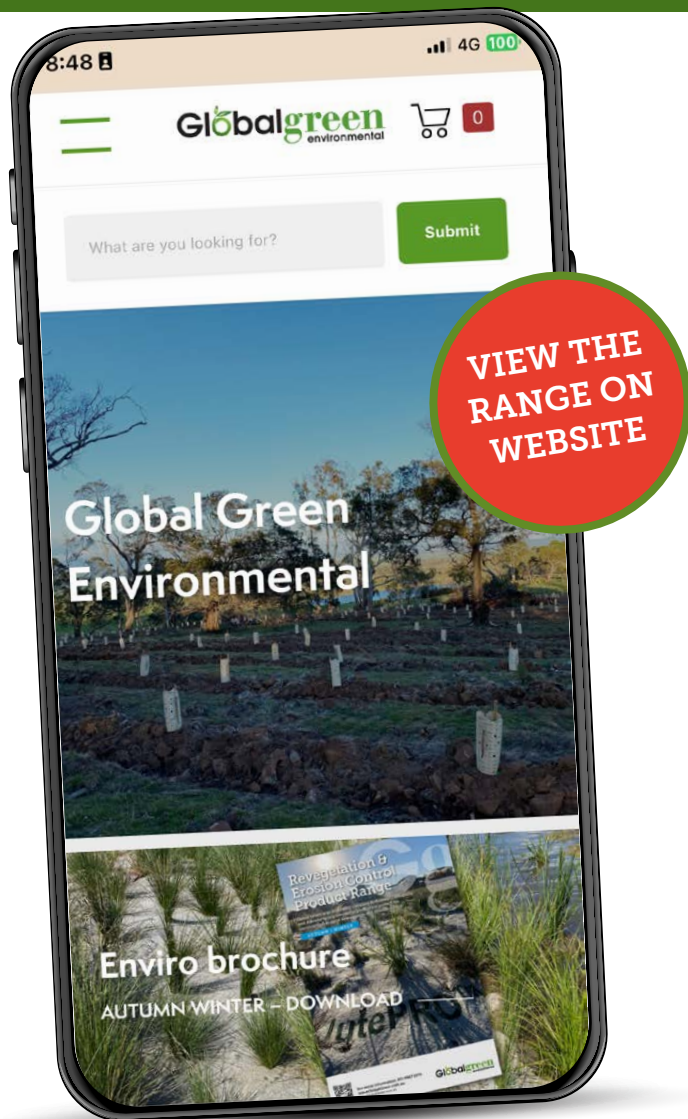

Ekidna steel mesh with spike barrier for large animal protection.

- Flat packed to enable efficient freight and transport to project sites with up to 200 on a single pallet
- Fast to install – about 10 minutes per plant
- Long lasting and reusable
- Guard sheets can be joined to create different configurations of guard size
- Can be used "in paddock"

<b>TGMSHEK1145</b>	MESH EKIDNA 114.5cm tall	1
<b>TGMSHEK1700</b>	MESH EKIDNA - 170cm tall	1

## Carton Tree guards

Carton tree guards offer an economical, user-friendly solution for protecting young trees. They are simple to set up and provide effective defense against small browsers, helping ensure the survival and healthy growth of new plantings.

Ideal for conservation and reforestation projects, these guards are both cost-effective and practical.

Biodegradable (Certified) option available (MILK2B)

<b>MILK1</b>	1lt Tree guard - 70 x 70 x 385mm - White	300pk
<b>MILK2</b>	2lt Tree guard - 95 x 95 x 300mm - White	250pk
<b>MILK2B</b>	2lt Biodegradable Tree guard - 95 x 95 x 300mm - White	250pk

## Weedmats

### greenMAT: Weedmats

GreenMAT weedmat, made from recycled paper & Innovative slit

<b>GREENMAT220</b>	Greenmat 220x220mm Recycled paper	50pk
<b>GREENMAT365</b>	Greenmat 365x330mm Recycled paper	25pk

## JutePro Weedmats

Biodegradable weedmats made from jute. Designed with a **center slit** for the plant and with 5 slots for stake positions to suit all guard types.

<b>JUTEPRO225</b>	JutePRO Weedmat 225mm x 225mm	100pk
<b>JUTEPRO370</b>	JutePRO Weedmat 370mm x 370mm	100pk
<b>JUTEPRO600</b>	JutePRO Weedmat - 600mm x 600mm	50pk
<b>JUTEPRO900</b>	JutePRO Weedmat - 900mm x 900mm	25pk

**Huge range of quality BamPro stakes available. An environmental alternative to hardwood stakes.**

## BamPro Stake

Stakes milled from large bamboo, sawn and pointed. Stakes have a hardwood stake profile as an alternative to hardwood stakes.

BAMPRO751220	Bamboo Stake 75cm 12x20mm	25pk
BAMPRO751523	Bamboo Stake 75cm 15x23mm	25pk
BAMPRO901220	Bamboo Stake 90cm 12x20mm	25pk

BAM2101618	Bamboo Canes 210cm 16-18mm dia	100pk

## What are the differences between BamPRO sawn Bamboo and Hardwood Stakes?

BamPRO™ stakes (bamboo-based stakes) have many clear advantages over conventional timber or plastic stakes, especially in environmental and performance contexts.

- Sawn like Hardwood, but made from Bamboo.
- Sustainable & renewable.
- Lower carbon footprint.
- Biodegradable.
- Strong & durable.
- Pest & rot resistance.
- Consistent sizing & finish.
- Cost-effective.
- Safe to handle.
- Supports compliance & ESG goals.

BamPRO stakes provides strength and durability like hardwood, without the environmental downsides, and with the added benefit of being safer and more sustainable.

## Hardwood Stakes

### 18x25mm & 25x25mm profiles

HW752518	Hardwood Stakes 75cm 25x18mm	10pk

HW1802525	Hardwood Stakes 180cm 25x25mm	10pk

**For large hardwood - see next page**

The establishment of Urban and development canopy is increasingly important. This reduces heat stress across communities and the environment.

Global Green offers a comprehensive range of urban canopy and streetscape solutions designed to support healthy tree growth and enhance urban environments. Our products cater to both planting projects and urban landscaping, ensuring trees thrive in various settings.

Our selection includes **hardwood stakes** (both painted and unpainted) for strong and durable tree support, as well as **BamPRO square stakes**, an eco-friendly alternative made from sustainable bamboo.

For optimal tree hydration and root protection, we provide **Greenwell tree collars**, which help conserve water and promote deep root growth.

To secure trees effectively, we offer tree ties designed for flexibility and strength. At Global Green, we are committed to sustainable urban greening by providing high-quality products that contribute to healthier, more resilient urban forests.

## Hardwood Stakes

## Greenwell Tree Collars

Ideal for assisting Councils, Urban Foresters and Landscapers to help efficiently water and protect the base of trees during establishment.

GWELL2B	Greenwell Tree collar - Large - 600mm top opening - 52 litre Black Colour
GWELL2G	Greenwell Tree collar - Large - 600mm top opening - 52 litre Green Colour
GWELLB-BULK	Greenwell Tree collar - Standard - 430mm top opening - 26 litre Black Colour
GWELLG-BULK	Greenwell Tree collar - Standard - 430mm top opening - 26 litre Green Colour

## Tree Ties

TIEJUTES30	Jute tree tie 50mm x 30m roll
TIEPOLY5100	Poly tree tie 50mm x 100m roll

## JutePro: Thick-Mat

JutePro Thick is Global Green's robust weed and erosion control geotextile blanket made from natural Jute fibres. Jute (*Corchorus* spp.) is a plant found on the sub-continent and is sustainably farmed.

Our superior grade of jute fibre is clean, has short and longer fibres which improves the tensile strength of the matting, and its performance on steep embankments and in storm events. Being denser, it provides good weed suppression, erosion control and moisture retention for better plant establishment and survival.

JutePro Thick is a roll out mulch barrier, providing weed suppression and moisture retention to enhance plant establishment, while protecting the topsoil from erosion.

JutePro Thick is made from selected, long clean Jute fibres to add strength and longevity and is 100% organic, biodegrading over time.

## Application

Natural mulch mat for weed and erosion control, ideal for:

- Slopes up to 1:1 grade
- Roadsides and open spaces
- Revegetation areas and garden beds
- Wetlands, Ephemeral zones, and riparian batters
- Coastal and high wind sites
- Water velocities up to 1.8 metres per second

## Product Range

<b>JUTEPROTM750S</b>	JutePro Thick-mat Roll - slit 1.83wide x 25m long (45.75m <sup>2</sup> ) Weight 750gsm
<b>JUTEPROTM750</b>	JutePro Thick-mat Roll - unslit 1.83wide x 25m long (45.75m <sup>2</sup> ) Weight 750gsm

## Specifications

<b>Name</b>	JutePro Thick.
<b>Material</b>	100% organic, biodegradable, high quality, long fibre Jute.
<b>Construction</b>	Central Hessian scrim. Upper and lower layers of jute fibres are tightly needle-punched onto the scrim.
<b>Mass</b>	750 gsm (nominal)
<b>Density</b>	110-120Kg/m <sup>3</sup> (nominal)
<b>Weight</b>	35kg per roll (nominal)
<b>Pinning rate</b>	3 - 4 pins per m <sup>2</sup>
<b>Dimensions</b>	1.83m x 25m (45.74m <sup>2</sup> )

Global Green have commissioned independent testing on JutePRO and generic Jute. Ask us about the results.

## Fastening

<b>PIN15COB</b>	Cobber Pin 15cm	1000pk
<b>PIN10HD</b>	PIN 100x30x100mm Flat top 4mm	150pk
<b>PIN15HD</b>	PIN 150x30x150mm Flat top 4mm	150pk
<b>PIN20HD</b>	PIN 200x30x200mm Flat top 4mm	150pk
<b>PIN30HD</b>	PIN 300x30x300mm Flat top 4mm	150pk

Other pin sizes by request including irrigation and galvanized.

## Soil Saver: Jute Mesh rolls (easier to handle)

Soil Saver is a loose jute cargo net style mesh. Its open structure allows grass and vegetation growth through, while providing erosion control and a microclimate for seed germination.

This open net can be draped over existing vegetation eg on sand dunes where it will capture sand and native seeds. Ideal for use on earthwork sites, slopes, coastal environments, swale drains and riverbank environments.

SOILS500ROLL
Soil Saver 1.22m x 68.5m Roll (83.5m2) 500gsm 28 Rolls per pallet
SOILS500BALE
JuteMesh bale 1.2mx549m (658m2)

## The CoirPro Range

Coir (coconut fibre) is ideal for products like erosion control and vegetation establishment geotextiles and silt berms. Coir has a high lignin content that gives it a 'woody' characteristic which enables it to cope with high-energy water flows with a long degradation period of 3-5 years.

### CoirPro Mesh - Coir Mesh

CoirPro mesh is a durable long-lasting ground cover matting. Its open structure allows grass and vegetation to grow through, while providing erosion control and a microclimate for seed germination. Ideal for use in wetlands, slope revegetation up to 1:1 grade, swale drains, sand dunes and riverbank environments.

COIRPROM400	CoirPro Mesh Roll - 2m wide x 50m Roll (100m2) 400gsm
COIRPROM700	CoirPro Mesh Roll - 2m wide x 25m Roll (50m2) 700gsm
COIRPROM900	CoirPro Mesh Roll - 2m wide x 25m Roll (50m2) 900gsm

## CoirPro Logs

CoirPro logs are a robust, long life coir fibre berm. Ideal for erosion control in wetlands, river and coastal environments, drainage lines, steep slopes and for ash control after bush fires.

Coir logs can also be used for sediment entrapment, wave and wind protection.

- Coir naturally breaks down for environmentally sensitive areas
- The robust coir fibre is ideal for the use in riparian environments, river banks, streams
- Coir logs are an alternative to rip rap and other coastal shoreline structures
- Steep slopes and gullies
- Open swale drains along roads where water and sediment can be captured
- For use in landscape rehydration projects as Leaky weirs, slowing streams and balancing flows
- Soil stockpiles, building sites, gutters and footpaths.

<b>COIRPROLR220</b>	CoirPro Round coir log 2m long x 20cm Dia
<b>COIRPROLR230</b>	CoirPro Round coir log 2m long x 30cm Dia
<b>COIRPROLR320</b>	CoirPro Round coir log 3m long x 20cm Dia
<b>COIRPROLR330</b>	CoirPro Round coir log 3m long x 30cm Dia

## Coir Pillow/Pallets composed from 100% coir fibre suitable for revegetation and erosion control.

### Description

Coir Pillow/Pallets are composed from 100% coir fibre which is a sustainable waste product from the husk of the coconut shell.

Coir Pallets can be an excellent technique for establishing native marginal vegetation around lake edges, streams and rivers banks.

Coir Pallets are an organic living revetment and provide erosion control and rapid vegetation establishment.

### Benefits

- Hydroponics growing of pre-vegetated mats
- Rapid vegetation of wetlands
- Seed germination
- Aquatic plant propagation
- Erosion prevention
- Stabilisation of eroding banks
- Instant refuge for wildlife
- Instant biodiversity in artificially lined ponds and lakes
- Improved water quality

<b>COIRPROP150</b>	1m x 1m x 5cm pillow
<b>COIRPROP250</b>	1m x 2m x 5cm pillow
<b>COIRPROP125</b>	1m x 1m x 2.5cm pillow
<b>COIRPROP225</b>	1m x 2m x 2.5cm pillow

## Pottiputki

POT45	Pottiputki 45mm planting tool
POT55	Pottiputki 55mm planting tool
POT63	Pottiputki 63mm planting tool
POT75	Pottiputki 75mm planting tool
POTBELT	Pottiputki Planting Belt
POTHARNESS	Pottiputki Planting Belt Harness
POTKIDNEY	Pottiputki Kidney Tray with Straps

## Hamilton Tree Planter

HTP40R	Hamilton Tree Planter 40-50mm Small Round, Hiko, Used for planting tube stock grown in Hiko forestry tubes.
HTP40SQ	Hamilton Tree Planter 40-70mm Square Forestry Tube , Used for planting tube stock grown in 50mm square forestry tubes
HTP80R	Hamilton Tree Planter 80-90mm Large Round, Used for planting tube stock grown in 80mm round tubes

**The STA logger is an automated GPS and data logging attachment designed to integrate with your existing weed control tools.**

**Have the edge on your next project using the STA logger. Subscription costs less than \$1 per day. Ask us about renting a STA Logger.**

### About the STA logger

A weed control solution designed for recording the metrics that are important to the forestry, land management and conservation industries.

You'll see where your weed control team has been, where they sprayed and can quickly analyse the patterns with a simple and easy to use reporting system. It's so easy, field operators simply clip it on and forget it's there.

Control is back in your hands with an efficient way of collating your data, reducing any operators' inefficiencies and improving reporting to clients, funding bodies and management.

### Why the STA logger matters

#### Simplicity of use

Field operators don't need to do anything. Once fitted, it is entirely automatic in its data collection and processing. Let your field operators do what they are best at and let the STA logger get you the data you need.

#### Ease of reporting

Your reports have never been easier with analytics and map production available through browser interface with no technical ability required.

#### Efficiency

There's no handling or processing of GPS files and it requires no manual intervention of any kind (other than charging a unit's battery) making all your weed management operations highly efficient.

#### Field viewing of data

Allow your operators to use Esri supported mobile apps in the field to navigate to infestations and locate weeds. iOS, Android and Windows are all supported.

#### Designed for the land management industry

Unlike other devices that are designed for general purpose or agricultural use, the STA logger is designed for recording and reporting the weed control metrics that are important to forestry, land management and conservation industries.

#### Integrate into your GIS

If your organisation or client uses GIS, they can add the data as a layer (without download) for advanced analysis or map production.
